

The Holley-Navarre Professional Firefighters Association Charity Golf Tournament Sponsorship Form

The Club at
**HIDDEN
CREEK**

The goal of this fundraiser will be two-fold. We will continue to raise awareness on behalf of those who are suffering from autism. We also want to make the treatments and therapy that are available today, more readily accessible than ever before. “Applied Behavior Analysis” is the use of basic behavioral practices (positive reinforcement, discrete trial teaching, programming for generalization to the natural environment, reinforcement, prompting and fading strategies, and outcome-based decision-making) to aid the development of language, positive life skills, and social behavior as well as to help decrease everyday social problems and serious behavior disorders” (Spectrum House Autism Center, 2018). The sooner that an individual with autism can start receiving treatment of ABA therapy, the better the outcome. Many insurance companies will not cover these treatments. Typically the treatments run about \$50.00 per hour. The severity of the diagnosis (mild, moderate, or severe) will determine the amount of hours necessary for proper treatment. For example, anywhere from 5 hours a week for a mild case, and up to 25 hours a week for a severe case. This is a challenge for a vast majority of families, and one that is rarely affordable. All the money raised by this tournament will be put towards a scholarship for families in need of ABA therapy, who can’t otherwise afford the cost associated with treatment.

Any sponsorship, donation, or help you can give is greatly appreciated! Now, let’s make the difference together!
